## **Introduction**

This document is meant to outline the backbone structure of OurCodeLab LLP company, the activities, and the programmes being run within OurCodeLab.

## **About OurCodeLab**

OurCodeLab LLP (Limited Liability Partnership) is a Singapore-based registered technology startup. OurCodeLab specialises in Software, Websites and Games. These products can appear in the form of a Mobile Application and Web Application.

OurCodeLab project scope lies in 3 groups, Internal, External and Client-based. OurCodeLab built in-house software that is meant to be used internally. Externally, we will build software or games released to the public through Apple App Store or Google Play Store. Lastly, OurCodeLab also creates client-based products as specified by their clients.

## **Mission**

*Building a new future, one line at a time*

## **Vision**

*We develop games that people enjoy.*

*We build software that impacts those around us.*

*We design websites that reshape the world.*

## Our Team

We are grateful to have a team with different skill sets and experiences. Our Team is committed to building the best quality and service products possible.

Our team is spearheaded by Gabriel Seet, CEO of OurCodeLab and Aamuel Chua, the Director and Founder of OurCodeLab. In our Development Team, we have Jeremy Tok, the Head of Software. Julia Lim, the Head of Software Design and Cody Tan, Head of Marketing Design. Lastly, in our administration team, we have Conan Zhang, Chief Liaison Officer and Hansen Lim, Chief Community Officer. They will be mainly managing within the CodeLab Community initiatives.

## Our Products

In 2017, we started on our very first product. It is an airline simulator, Aviation Management. It is a mobile application for both Apple iOS and Google Android devices. It is our first mobile application and the first project we have embarked on. Since its launch in 2020, Aviation Management has received overwhelming support with regard to the quantity downloads with several helpful suggestions and feedback.

In 2021, we have embarked on and completed many projects such as Data Analytic Software, multiple games, a Business Management Software for small businesses and a Loyalty Programme. We are focusing on building our business profile and portfolio. Our products are classified into three categories: Software, Games and Websites. These products can come in the form of a Mobile or Website Application. We have embarked on several client-based projects, such as our latest edition, Foodary, our solution to a Mobile Food Loyalty Programme system.

Here is the list of our released products:

Product Name	Product Type	Platform	Project Type
Aviation Management	Game	iOS   Android	External project
Hangman	Game	iOS   Android	External project
Impossible Cookie	Game	iOS   Android	External project
Data Analytics Programme	Software	Windows	Client Project
My Business Partner	Software	iOS   Android	External project
Idle Boards	Software	iOS   Android	External project

Here is the list of our Company portfolio projects:

Project Name	Product Type	Classification
Custom Websites	Website	OurCodeLab Solutions
Loyalty Programme	Software	OurCodeLab Solutions
Point Of Sales Programme	Software	OurCodeLab Solutions
Simulation Game	Game	OurCodeLab Simulations
Data Processing Analytics	Software	OurCodeLab Simulations

## Our Media Contact Channels

As a young and emerging startup, we are active on our social media platform. We want to connect with our clients, customers and users swiftly as we understand the importance of providing efficient and helpful support.

## Legal Matters

OurCodeLab is registered as a Limited Liability Partnership company which gives us the flexibility of having a partnership yet allows us to act as a private entity firm. Our Unique Entity Number (UEN) is T21LL1493F.

Our company operations deal with clients and users. We will collect user information and data. As such, we are very committed to ensuring that our company holds our clients' data and activity to the highest standard to prevent any form of a data breach. We have internal procedures set into place on who has access to the data.

## **Our Activities**

Our main activity in OurCodeLab is building helpful and powerful software solutions and publishing them on Apple App Store and Google Play Store so that everyone can use them. We also do research and development of new technologies that have emerged.

Apart from software, games, and website development, OurCodeLab has another CodeLab Community initiative. CodeLab Community aims to unite the next generation of programmers. CodeLab Community strives to be Singapore Tech Hub, whereby students and youth can be part of this open club. In CodeLab Community, we will want to nurture students and youths potential in technology and challenge them even further.

CodeLab Community will cover anything technology-related, from simple computer programming to machine learning, artificial intelligence, computer vision and more. CodeLab Community is still in conception, and the community is due to be launched in Early 2022.

We will stay with these two initiatives as we do not want to dilute our brand. We will consider expanding to more opportunities in the future.
